

SQL SERVER 2016

Chapter 02: How to use the Management Studio

INSTRUCTOR: MD. HABIBUL HAQ
domain.habib@gmail.com

Q1. What is the purpose client tools installed with SQL server database service?

- A. Provide API for client applications to communicate with SQL database service
- B. Provide an interface for working with the databases
- C. Provides tool manage remote client connection to an SQL server instance
- D. All of the above

Answer: B

Q2. Which one provides a graphical interface to send queries to a particular instance of SQL Server and view the result of the query sent?

- A. SQL Server Configuration Manager
- B. SQLCMD
- C. SQL Server Management Studio
- D. SQL Data tools

Answer: C

Q3. Which one is **NOT** the function of SQL Server Configuration Manager?

- A. Manually start and stop the database server
- B. Enable/Disable remote connections
- C. Set order of protocols be used by server and clients
- D. Enable/disable SQL Server reporting service

Answer: D

Q4. By default, remote connections are enabled for SQL Server 2016.

- A. True
- B. False

Answer: B

[Ref.: Page 53]

Q5. How many types of authentication are supported by SQL server to access?

- A. 2
- B. 4
- C. 8
- D. 16

Answer: 2

Q5. Which authentication types are supported by SQL Server?

- A. Windows Authentication
- B. SQL Authentication
- C. Digest Authentication
- D. Third party authentication (like Facebook)

Answer: A, B

Q6. When connection with SQL Server, SQL Authentication option to let Windows supply the appropriate login name and password for you?

- A. True
- B. False

Answer: B

[Ref.: Page 54]

Q7. To connect to a SQL database server, you have to enter _____.

- A. the name of the computer, followed by a dot, followed by the name of the SQL Server database server
- B. the name of the computer, followed by a front slash, followed by the name of the SQL Server database server
- C. the name of the computer, followed by a backslash, followed by the name of the SQL Server database server
- D. the name of the computer, followed by a dash, followed by the name of the SQL Server database server

Answer: C

[computername\servername]

[Ref.: Page 55]

Q8. To connect to the SQL Server Express database engine when it's running on your PC, you can use the _____ keyword to specify your computer as the host machine.

- A. local
- B. host
- C. localhost
- D. current

Answer: C

[Ref.: Page 55] [You can use dot (.) for local machine]

Q9. Windows authentication is typically used only with non-Windows clients to connect with SQL Server.

- A. True
- B. False

Answer: B

[SQL Authentication is typically used only with non-Windows clients. Ref.: Page 55]

Q10. Which window in the Management Studio is used to navigate through the database objects that are available from the current database server?

- A. Object explorer
- B. Solution explorer
- C. Toolbox window
- D. Properties window

Answer: A

Q11. You see a table dbo.Product under a database, what does the dbo. quantifier indicate?

- A. The Product table belongs to dbo database
- B. The Product table is in Database Server named dbo
- C. The Product table copied from the dbo database the the current database
- D. The Product table belongs to the dbo schema

Answer: D

[Ref.: Page 56]

Q12. In SQL Server, a schema is _____.

- A. a container that holds temporary tables
- B. a container that holds objects
- C. a built-in power user that has rights to create objects

D. a collect of administrative rights

Answer: B

[Ref.: Page 56]

Q13. If you don't specify a schema when you create an object, _____.

- A. it's stored in the default schema, sa
- B. it's stored in the default schema, dbo
- C. it is not associated any schema and you will find it difficult giving rights to users for the object
- D. it's stored in tempdb database

Answer: B

[Ref.: Page 56]

Q14. Which one can you use to make it easier to implement the security for a database?

- A. Trigger
- B. User-defined function
- C. Login
- D. Schema

Answer: D

[Ref.: Page 56]

Q15. How many files at least a SQL Server database has?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: B

Q16. What is the extension of a SQL database data file?

- A. .data
- B. .df
- C. .mdf
- D. .ldf

Answer: C

Q17. Which file at least do you need to attach a database to a SQL Server?

- A. Data file
- B. Log file
- C. Either data file or data file
- D. Both data file and log file

Answer: A

Q18. Can you attach a database that doesn't have a log file?

- A. Yes
- B. No

Answer: A

[Management Studio will create a new log file for the database, Ref.: Page 58]

Q19. Which one provides the easiest way to view the relationships between the tables in a database?

- A. Object explorer
- B. Query designer
- C. Database diagram

D. Toolbox

Answer: C

Q20. Which key can you use to execute a query?

A. Ctrl + E

B. Ctrl + F5

C. F5

D. F2

Answer: C
