

ASP.NET Core in Action

Chapter 01: Getting started with ASP.NET Core

19 February 2024

Q1. Which of the following is NOT true about ASP.NET Core?

- A. ASP.NET Core is a cross-platform, open source, web application framework that you can use to quickly build dynamic, server-side rendered applications
- B. ASP.NET Core has built-in support to create HTTP APIs that can be consumed by mobile applications, by browser-based single-page applications such as Angular and React, or by other backend applications.
- C. ASP.NET can be used to create native mobile applications that run on Android, IOS platform
- D. ASP.NET Core provides structure, helper functions, and a framework for building applications

Answer: C

[Page 4]

Q2. Which one is the default web server to run ASP.NET Core web applications?

- A. IIS
- B. IIS Express
- C. Apache
- D. Kestrel

Answer: D

[Page 8]

Q3. Which one is the cross-platform web server?

- A. IIS
- B. IIS Express
- C. Apache
- D. Kestrel

Answer: D

[Page 8]

Q4. Which one starts up an instance of an ASP.NET Core web server?

- A. A windows service application
- B. A windows form application
- C. A console application
- D. A nodejs application

Answer: C

[Page 8]

Q5. Your web application logic is run by _____.

- A. web server
- B. OWIN middleware service
- C. IIS that acts as reverse proxy
- D. None of the above

Answer: A

[Page 8]

Q6. Which one acts as a reverse proxy?

- A. IIS/Apache/NGINX
- B. Kestrel web server
- C. Core infrastructure
- D. Middleware service

Answer: A

[Page 15]

Q7. Which one receives user requests in an ASP.NET Core web application?

- A. IIS/Apache/NGINX that acts as reverse proxy
- B. Kestrel web server
- C. Core infrastructure
- D. Middleware service

Answer: A

[Page 15]

Q8. Which one processes user requests in an ASP.NET Core web application?

- A. IIS/Apache/NGINX that acts as reverse proxy
- B. Kestrel web server
- C. Core infrastructure
- D. Middleware service

Answer: B

[Page 15]

Q9. Which one generates responses in an ASP.NET Core web application upon user requests?

- A. IIS/Apache/NGINX that acts as reverse proxy
- B. Kestrel web server
- C. Core infrastructure and application logic
- D. Middleware service

Answer: C

[Page 22]

Q10. What is a reverse proxy?

- A. A reverse proxy is a service acts in request pipeline stack performs certain task and passes to next service
- B. A reverse proxy is software responsible for receiving requests and forwarding them to the appropriate web server.
- C. A reverse proxy is software responsible for processing application logic and generating responses.
- D. A reverse proxy is software responsible for handling user requests

Answer: B

[Page 23]

Q11. Legacy technologies such as WCF Server and Web Forms can be used with ASP.NET Core.

- A. True
- B. False

Answer: B
